

Trek Possibles Bag Sewing Directions

FOR BAG:

Cut a 10" X 22" rectangle of fabric for the body of the bag

Serge short ends or fold in 1/4" and stitch

Fold fabric in half and serge the sides of the bag, backstitch at the ends.

FOR STRAP:

Cut a 4" X 45" length of fabric for the strap

Fold in half to make a 2" X 45" strap

Serge along the length of the strap

ATTACHING THE STRAP:

Sew the strap to the inside of one side of the bag, twist once and sew to the opposite side of the bag. (The serged ends will both face the center of the bag.) Backstitch so that the strap will stay on securely. (This bag will be worn across the shoulders, so the one twist helps the strap to lay flat across the body.)

Fabric Requirements:

Possibles Bag:

The pattern is 22" tall and 10" wide

Finished bag is approximately 10 1/2" tall and 9 1/2" wide

Fabric requirements:

45" fabric: 10 yards = 72 bags

54" fabric 10 yards = 80 bags

60" fabric: 10 yards = 96 bags

Shoulder Strap:

If using fabric, the pattern for the shoulder strap is 4" wide and 45" long

If using webbing, cut to 45" lengths

Finished product is 2" wide and 44" long

Fabric Requirements:

10 yards of approximately 2"-wide webbing = 8 straps

10 yards of fabric = 90 straps (4" strips folded then serged)

Remember to get a little extra, as the fabric is not always cut straight and you lose a little straightening it up.

Sergers would be great, at least for the straps.

Rolling cutters would speed up the cutting job and make it more accurate.
